

Are you over 65 & taking any of these medications?

- Clonazepam (Rivotril)
- Diazepam (Valium)
- Flurazepam (Dalmane)
- Lorazepam (Ativan)
- Oxazepam (Serax)
- Temazepam (Restoril)
- Triazolam (Halcion)
- Zopiclone (Imovane)

These medications can be harmful in older patients. Please talk to your doctor or nurse-practitioner about the risks versus benefits of continuing to take these.
